TECHNICAL SKILLS

Backend Knowledge

- Node.js and Express.js
- RESTful APIs
- JWT Authentication
- OWASP Top 10 Security
- Rate Limiting and Middleware

Databases & Cloud Storage

- MongoDB (Mongoose ODM)
- MySQL
- Cloudinary

Frontend Knowledge

- Vue.js and Angular
- JavaScript (ES6+), TypeScript
- HTML5, CSS3
- Bootstrap, TailwindCSS

DevOps & Tools

- Docker
- GitHub Actions (CI Pipelines)
- GitHub, VS Code
- Postman
- Figma

SOFT SKILLS

- Problem Solving
- Time Management
- Willingness to Learn
- Effective Communication
- Teamwork

PROFILE

Motivated Management Information Systems (MIS) student (Year 2, Semester 2) with practical experience in full-stack web development, RESTful API design, and database management. Hands-on experience building end-to-end applications using Vue.js, Node.js, Express, TypeScript and database systems (MongoDB). Skilled in implementing JWT authentication, OWASP security practices, and CI pipelines. Driven to leverage strong RESTful API design and server-side skills as a Web Developer Intern to contribute to high-performance software development projects.

EDUCATION

High School

- Grade B on BACII

Bachelor's Degree in Management Information Systems (MIS)

- SETEC Institute (Year 2, Semester 2), GPA: 3.95 / 4.0

PROJECTS

Full-Stack E-Commerce Web Application

- **Frontend:** Developed responsive UI layouts using Vue.js, TypeScript and Tailwind CSS for product listings, shopping carts, and dashboards.
- **Backend & APIs**: Designed and implemented scalable RESTful APIs using Node.js and Express.js to handle user workflows and product management and ABA payway integration.
- **Cloud Storage Integration:** Integrated Cloudinary API with Multer middleware for optimized product image uploads.
- **Authentication & Security:** Built secure authentication flows featuring JWT sessions, OAuth 2.0 / Social Logins, post login email verification, and OWASP compliant middleware with rate limiting to prevent brute-force attacks.
- **Database Management:** Structured MongoDB collections, optimizing schemas, queries, aggregation and indexing for efficient data retrieval.
- **CI Pipeline:** Automated frontend and backend integration using GitHub Actions.
